THE LANDSCAPE DEPARTMENT

J. L. Scofield Harold C. Cowell John P. Rogers

These planting designers are the key men in our landscape organization. Upon their knowledge and skill in arranging and grouping plant types depend the finished picture of your home.

May we, without any obligation on your part, make suggestions for that new or additional planting you are planning?

EVERGREEN TREES Firs

THE Firs grow tall and pyramidal, preferring moist, well drained soil. Very symmetrical with softer foliage than the Spruces.

Hemlocks

Canada Hemlock

No evergreen is more graceful or beautiful than our Canada Hemlock. It will thrive in sun or shade, and laughs at subzero weather. The dwarf form is very desirable where a slowgrowing compact plant is required. The Sargent's Weeping Hemlock is very unusual. We have some fine specimens of this rare plant.

Five or more plants at price of 10 rate

Plant now and enjoy the rewards of your efforts next year and in the years to come. For example, planted this spring, a small bed of asparagus will furnish delicious meals in 1947; raspberries and blackberries will bear copiously then, too. Fruit trees planted now should begin bearing in about four years.

FRUIT TREES

Ready-to-Bear Trees:

We have a fine stock of several times transplanted trees. Available in McIntosh, Baldwin, Red Delicious, Northern Spy, Yellow Transparent, Gravenstein, Fameuse and Rhode Island Greenings. These should begin to bear well within three years. Specially priced at \$6.00 each, \$54.00 per ten.

Combination Fruit Trees:

Grow 5 varieties of apples all on one tree! We offer 5-N-1 apple three priced at \$3.50 each. Varieties grafted on each tree are Yellow Delicious, Double Red Delicious, Red Rome Beauty, Yellow Transparent and Stayman's Winesap.
